Memo to File:

RE: Whirlwind Mine
ACT/037/032

On March 20, 1978 Mr. Harold Ellings of the National Park Service visited with Ron Daniels, Jim Smith, and Mike Thompson concerning the Whirlwind Mine. He informed the Division that the Park Service was a joint owner with the Bureau of Reclamation of the surface of Section 2, Township 41 South, Range 13 East for the area below the high water elevation of 3,720 feet and that the Bureau of Reclamation was the sole surface owner above that elevation.

A telephone conversation with Mr. Nick Jelaca of the Bureau of Reclamation on March 23, 1978 verified the above information. Mr. Jelaca stated that as far as he knew the Bureau of Reclamation had no objections to Mr. Redd's operation and no requirements as far as reclamation of the surface disturbances. A notice of filing will be sent to the Bureau of Reclamation for their information.
